Kauno technologijos universiteto biblioteka
biblioteka@ktu.lt

leškodami mokslinės literatūros, renkame nuorodas į šaltinius, kaupiame straipsnius, knygas, jų bibliografinius įrašus ir kt.

Dideliame surinktos informacijos kiekyje lengva pasiklysti, todėl atsiranda poreikis informacijos sisteminimui, kad būtų patogų ją greičiau surasti, pasiekti ar pasidalinti su kitais.

Bibliografiniai įrašai / duomenys – tai duomenys apie dokumentą, pagal kuriuos apibūdinamas ir atpažįstamas dokumentas.

Pvz.: pavadinimas, autorius, leidimo vieta, leidimo metai ir kt.

Bibliografinių įrašų tvarkymo programos yra skirtos palengvinti bibliografinės informacijos tvarkymą.

Pavyzdžiui:

- dokumentų išsaugojimas;
- bibliografinių įrašų išsaugojimas iš bibliotekų katalogų, tinklalapių, duomenų bazių ir kt.;
- citavimo nuorodos tekste įterpimas vieno mygtuko paspaudimu;
- automatinis literatūros sąrašo suformavimas pagal pasirinktą citavimo stilių.

Mokamos:

- *RefWorks*

- *EndNote*
<http://myendnoteweb.com>

Nemokamos:

- *Mendeley*
<http://www.mendeley.com>
- *Zotero*
<http://www.zotero.org>

zotero

- galimybė **išsaugoti** informacijos šaltinių bibliografinius įrašus;
- įrašus galima **rūšiuoti** į katalogus pagal temas arba kitus požymius, **redaguoti**, atlikti įrašų paiešką;
- **rengti literatūros sąrašus** pagal įvairius citavimo stilius;
- rašant darbą *MS Word* programoje galima **įterpti nuorodas** į šaltinius tekste bei parengti literatūros sąrašą;
- galima **išsaugoti** visateksčius dokumentus;
- patogus *PDF* dokumentų skaitymas, tvarkymas. Leidžia *PDF* dokumentuose rašyti pastabas, komentarus.

***RefWorks* galimybės – bibliografinės informacijos išsaugojimas**

ktu

Galimi keli bibliografinės informacijos išsaugojimo *RefWorks* programoje būdai:

- tiesioginis bibliografinių įrašų talpinimas iš duomenų bazių;
- bibliografinių įrašų kūrimas rankiniu būdu;
- įrašų importavimas iš kitų informacijos tvarkymo programų.

remain in the classroom teaching children while simultaneously participating in meaningful activities beyond the classroom that contribute positively to the school (Wenner & Campbell, 2017). Teacher leaders can serve in a seemingly unlimited number of ways because schools can tailor the leadership position to fit the specific school context (Cooper, Stanulis, Brondyk, Hamilton, Macaluso, & Meier, 2016).

In the past, schools have created various teacher leadership roles, such as mentors, cooperating teachers, department chairs, team leaders, and professional developers (Bond, 2015). The research examining these areas is robust (Nguyen, Harris, & Ng, 2020). However, a review of the scholarly literature revealed few studies about some of the more common leadership roles in elementary schools, namely reading specialist, English as a Second Language (ESL) specialist, and

The descriptions of these teachers' work may inform others who are interested in teacher leadership at the elementary school level.

Conceptual Framework

The theory of distributed leadership serves as the conceptual framework for the study (Spillane, 2006). According to this theory, leadership is distributed or shared among people in an organization. Rather than one person acting as leader, multiple people carry out leadership functions in the organization simultaneously (Lambert, 2003). People think and work collectively in a web-like structure and alternate between serving as leaders and as followers. The context and organic nature of the work dictate how people interact and lead.
